Forecast for Wednesday 27 Apr 2022

Weather: A chilly start with sunny intervals, although some patchy low cloud may cover a few slopes in the east and southeast around dawn. A fair amount of cloud likely through the morning, but tending to thin and break mid-afternoon onwards. Dry throughout with light winds.

Chance of cloud-free hill tops above 600m: 90% becoming 100% after dawn.

Low cloud and visibility: Some patches of cloud may affect east and southeastern slopes between around 200-400 metres first thing in the morning, bringing some locally poor visibility, this quickly lifting to leave all cloud bases above the summits through the day with good visibility at all levels.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Layers are recommended as even with light winds it will still feel close to or just below freezing on the summits during the morning. Strong sunlight and high UV levels are possible into the afternoon and sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Thursday 28 Apr 2022

Weather: A bright and chilly start to the morning, with early patchy mist and shallow fog in the valleys clearing soon after dawn. Some patchy lower cloud may cover some hill tops in the east at first, but this will soon lift clear of the summits. Remaining dry with sunny spells throughout the day, but with a veil of high cloud making the sunshine rather hazy.

Maximum wind: Easterly 10-15mph.

Chance of cloud-free hill tops 600m: 90% becoming 100%.

Low cloud and visibility: Locally poor in any valley mist and fog patches, and some patchy low cloud may cover slopes above 200-400m in the east at first. This will readily lift, with summits remaining cloud free through the rest of the day and with generally good visibility at all levels.

Temperature: **Valleys:** Minus 1 Celsius becoming plus 13 Celsius.
At 600m: Plus 3 Celsius
Freezing level: 700m at first rising above the summits through the day.
